(54) Title: TEXTILE PRODUCT WITH IMPROVED ABRASION RESISTANCE AND PROCESS FOR THE PRODUCTION THEREOF

(57) Abstract: The invention relates to a textile product in which a three-dimensional pattern is applied on a textile substrate having a certain abrasion resistance, whereby the three-dimensional pattern covers at least 15 % of the area of the textile substrate, so that the abrasion resistance of the textile product lies beyond the abrasion resistance of the textile substrate. As a consequence, the abrasion resistance of a textile substrate can be improved by a process in which a textile substrate web having a certain abrasion resistance is provided and a three-dimensional pattern covering at least 15 % of the area of the textile substrate web is applied thereupon.

* Special categories of cited documents:

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- *G* document member of the same patent family
